Orthoses: 1-2-3 PRO-GRIP & 1-2-3 PRO-REST (1-2-3 Easy Apply Strap Guide)

LEEDer Flex-E-Core Flexible static braces provide dynamic properties to effectively treat neuro-contractures. All Flex-E-Core Hand Orthoses have a patented negative tension force that will "Flex" with episodes of abnormal tone to accommodate spasticity. This provides abnormal-reflex-arc therapy, which can reduce the intensity and duration of spasticity over time. Flex-E-Core Orthoses will gently "Flex" into contractures to reverse lost range of motion.

1-2-3 PRO-GRIP HAND SPLINT ORTHOSIS

- **Insurance Code M24.54 OR M24.53**
- Professional LG PRO-GRIP Flex-E-Core Neuro-Dynamic Therapy designed for a "fisted" Hand (clenched fingers) and more severe wrist contracture.
- **Adjustment Rolls to gently return hand to normal "C" position**
- The LG PRO-GRIP can reverse moderate to severe flexion and/or spasticity of wrist, hand, & fingers.
- It provides neuro-rehabilitation while the patient wears the device.
- Incrementally larger palmar rolls included to gradually open the hand.
- Flex-E-Core PRO-GRIP is adjustable without heat or tools.
- It provides gentle ulnar drift correction and it is supplied with Finger Separator
- **Extra Adjustment rolls Included**
- No Latex.

BOC PRO-LSO

- **Insurance Code S34.102**
- One size: Fits up to 52 inch waist
- **RECOMMENDED** for lower, lumbar back pain discomfort and support
- **Professional Opposing force RIGID compression panels** pressurize the spinal column and relieve pinched nerves
- **A Compression Field** surrounds the spinal column so that the panels apply “**intra-cavitary pressure reducing load on the inter vertebral discs**”
- **Stabilizes** the spinal column allowing controlled movement without pain and relieving painful vertical spinal compression conditions
- **Non-Elastic straps**
- **Lumbar Dome**
- **Reduces Pain**
- **Easy Don/Doff**
- **High Patient Compliance**

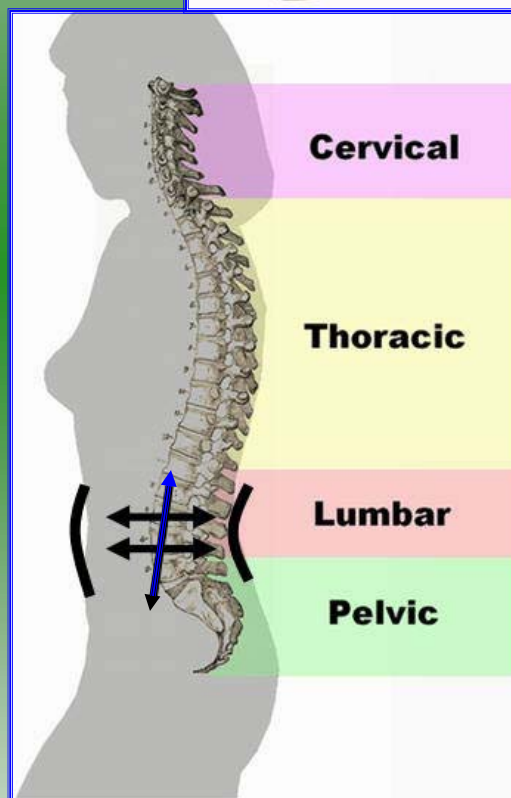

ORDER CODE: BOC PRO

PRO-LSO ORTHOSIS

All Sizes Fit up to 52 inch waist

- **Insurance Code S34.102**
- **Professional Low Pressure Design** with No-Stretch Straps relieves pain by lifting the spinal discs
- **Flex-E-Core Adjustment** allows custom fitting to patients' Lumbar Curve
- **Non-Elastic Straps** provide greater comfort and compliance
- **Facilitates Healing** by immobilizing and stabilizing the spine
- **Intra-cavitary pressure** lifts the spinal discs relieving pinched nerves
- **Flex-E-Core Ferro-Plastic Composite Panels** Allow Custom Fitting Without Tools or Heat
- Easy to put on and off with Quick Release Buckles

<u>Size</u>	<u>Anterior Panel Vertical Hgt.</u>	<u>Posterior Panel Vertical Hgt.</u>	<u>Product Code</u>

Bariatric	Up to 32" Thigh Circumference	LHKO32

LEEDer Group Product Testimonials

There is no other product like this.

Here's what some technical users say about our Multi Use Boot/Night Splint:

*"I wanted to let you know that **I have had great success in my Podiatry practice using several of the LEEDer group products.** Not only are the products economical, they are also very effective. **I've had great results using the multi-use boot** as a night splint for plantar fasciitis. I have the patient progressively increase the tension on the dorsiflexion straps every few days. These patients often **get complete relief** over a period of a few weeks. The nice thing about the multi-use boot is its ability to **easily bend and mold** to the exact contour of the patients foot. When I use the boot to float a patient's heel with an ulcer or to support a patient with arthritis, tendonitis or a sprain, **I can bend the device for those people with severe inversion/eversion deformities** or with a plantar flexion deformity. This allows **for a comfortable and effective fit every time and increases patient compliance.** Lastly, I use the **regular LEEDer boot** in bed bound patients to improve plantar flexion contractures and to float the heels **to prevent or heal ulcers.** The device **also protects the patient's lower legs and toes from injury.** The device is also useful in those patients that are working with physical therapists and need stability while improving their walking and leg strength. **The boots can be used for so many other conditions as well.** Practitioners will find their favorite conditions to treat. Just wanted to share my experiences and successes and hope you will share it with others."*

Sincerely, Marc A. Katz, DPM Tampa, FL

.....

Therapist, Mariann B., from Pennsylvania says: *"Thank you for the info on the Multi Use Boot. **The accounts that have tried it, LOVE it!!!** It does fill a need for those patients with lots of skin breakdown [softest interface available] who need a lighter boot. It has been more popular with the Occupational Therapists who seem to get all the problems that no one else wants to address. **It's a great boot** when used correctly... **all the feedback I have received is POSITIVE!!! Thank You!!!!**"*

For even more favorable testimonials see our website at LEEDerGroup.com
